LANDING PAGE banners will always link to home page

search function
searches EVERYTHING
file names, category names,
category contents, etc

complete list of category
links to view/edit all of them

create new category

user list - make
sure
admin/guest/user
are listed

link to a page
with the edit/add
and the entire list

suzy
aunt mary
uncle bob

maybe we can
do user history

click on bob's
name and we
can see which
categories he
made/edited

recently edited category

recently edited
category

recently edited
category

logo/banner links to the homepage
CATEGORY LIST

the exact same create new category function

the exact same search function

user list - make sure admin/guest/user are listed

link to a page with the edit/add and the entire list

suzy
aunt mary
uncle bob

maybe we can do user history

click on bob's name and we can see which categories he made/edited

complete list of categories

links to get into the edit/upload page

the upload functions only exist inside of the actual category page.

the list maybe has stuff like

number of documents
accessible by ADMIN ONLY
date created
date of activity

CREATE CATEGORY
logo/banner

exit the create page, with a popup asking to be sure

i dont want search functions, i dont want links to users, etc etc etc.

create category name

information field

information field

information field

need to display the current list so they do not re-create one.

LIST OF DOCUMENTS UPLOADED

we want to make sure they can upload a few documents when they create this

and we want to make sure we list out what theyve uploaded

we also want a very very small brief description of the uploaded document

upload button where they select the file

submit button will take you to the category list

CATEGORY PAGE TEMPLATE
banner/logo
link to homepage

SEARCH FUNCTION

complete category list

create new category

POWER OF ATTORNEY
NEXT OF KIN
WHATEVER THE CATEGORY NAME IS

user list - make sure admin/guest/user are listed

link to a page with the edit/add and the entire list

suzy
aunt mary
uncle bob

maybe we can do user history

click on bob's name and we can see which categories he made/edited

link to uploaded document preview.
we also want some download functionality
this field with the link should also contain the description

link to uploaded document preview.
we also want some download functionality
this field with the link should also contain the description

need more information from debbie regarding what kind of information we should display/request for these categories.

link to uploaded document preview.
we also want some download functionality
this field with the link should also contain the description

this edit function should link to 'create a category' somehow we need to populate the create category page, so that we can just edit the category page that already exists.

search function
logo/banner link to homepage.

complete category list

create new category

user list - make sure admin/guest/user are listed

link to a page with the edit/add and the entire list

suzy
aunt mary
uncle bob

maybe we can do user history

click on bob's name and we can see which categories he made/edited

search term input field

submit search button

listed search results, i think it pretty much will only display a link to the category that the search pulled up.

maybe the search pulls up user profiles also.

hopefully we can search the filenames of the pdf they uploaded.

we can definitely search the category names, search the text they put into the information fields, etc etc etc.

USER LIST
logo/banner link to homepage

search function

category list

create category

add user

list of users

clicking the link will go to the profile, the profile will have an edit button ONLY IF THE ADMIN PROFILE is accessing the user's profile.

SUZY Q's PROFILE
logo/banner link to homepage

search function

complete list of categories

create new category

user list - make sure admin/guest/user are listed

link to a page with the edit/add and the entire list

suzy
aunt mary
uncle bob

maybe we can do user history

click on bob's name and we can see which categories he made/edited

some basic info about Suzy Q,
maybe we do birthdays and whatever
it just matches whatever we use on create user page.
we list suzy q's role, admin or whatever.

i wonder if we can list "activity history" of users
like, can we see if suzy Q deleted or uploaded?
should we try to, like, make little notes on the category page of who uploaded what?

edit user profile.

CREATE NEW USER
logo/banner

no search, no links.

just an exit button with a popup

name

birthday

whatever

profile pics?
or thats a waste

whatever

admin, user, or guest

submit button will take you to the
user list
